

Harika Vundemodugula

Hyderabad, India

harikavv2401@gmail.com — +91 7013305769 — [Portfolio](#)

Profile

Motivated Computer Science undergraduate with hands-on experience in full-stack web development using the MERN stack. Strong foundation in building scalable web applications, implementing secure authentication, and deploying end-to-end solutions.

Skills & Achievements

- **Technical Skills:** Python, SQL, HTML, CSS, JavaScript
- **Tools & Platforms:** Visual Studio Code, GitHub
- **Behavioral Skills:** Problem-solving, Team collaboration, Leadership, Adaptability

Education

B.Tech – Computer Science Engineering

Bhoj Reddy Engineering College for Women, Hyderabad

CGPA: **8.45/10**

Nov 2022 – May 2026

Experience

MERN Stack Developer Intern Friction Foundation

Jan 2026 – Present

- Contributing to the development of the Friction Foundation website using the MERN stack.
- Implemented frontend components and backend APIs to enhance usability and performance.
- Gained hands-on experience in full lifecycle web application development and deployment.

Projects

Virtual Assistant

MERN Stack

- Developed a web-based virtual assistant capable of responding to user queries and executing system-level tasks.
- Implemented secure user authentication and real-time command handling using MongoDB, Express.js, React.js, and Node.js.
- Deployed the application with complete frontend–backend integration.
- Live Demo: virtualassistant-frontend-a42s.onrender.com

Online Products Suggesting Website

Django, Python

- Built a recommendation system for skincare and haircare products based on user inputs.
- Designed backend logic using Django and Python to generate dynamic suggestions.
- Created a responsive user interface using HTML and CSS.
- GitHub: github.com/Harika2401/HSM
