

Harika V

Aspiring Software Developer

+91-7013305769 | harikvv2401@gmail.com | [portfolio](#)

Summary

An **Aspiring Software Developer** with a solid foundation in computer science and a passion for building scalable, maintainable applications, and a strong focus on delivering robust, user-centric solutions. As a **Class Representative**, demonstrated effective leadership, team coordination, and conflict resolution skills—fostering communication between faculty and students while ensuring collective goals were met. Known for a **collaborative mindset**, problem-solving abilities, and a dedication to continuous learning. **Committed to writing high-quality code** and making meaningful contributions to impactful projects.

Projects

Online Products Suggesting Website

- Developed a personalized recommendation system for skincare and haircare products based on user inputs such as skin type, hair texture, and concerns.
- Implemented a responsive UI with HTML, CSS, and JavaScript, and managed **backend logic using Django**.
- Implemented skin-type selection and a logic-based recommendation engine using Python.
- **Used encryptions for user login.**
- Stored user data and product metadata securely using a structured database (SQLite).
- GitHub: <https://github.com/Harika2401/HSM>

Handwritten Image to Excel Conversion

- Created a web platform that extracts handwritten loan form data and converts it to Excel.
- Utilized **Tesseract OCR** and Python for image data extraction and formatting.
- **Reduced manual data entry by 80%** via regex-based extraction.
- Enabled structured export using **Pandas**.
- GitHub: <https://github.com/Harika2401/projects>

Certification

[Java \(Basics\) Accomplishment – HackerRank](#) [September,2024]:

Attempted Java(Basics) skills test, which covers basic concepts of java such as classes, data structures, inheritance, exception handling.

[Java Programming – Udemy\(in28Minutes\)](#) [July,2025]:

Practiced core Java through structured lessons and coding exercises focused on OOPS and control flow.

Education

Bhoj Reddy Engineering College for Women

[Nov 2022 – Aug 2026]

Bachelor of EngineerinSg in Computer Science and Engineering

CGPA: 8.44

Technical Skills

Programming Languages: C, Python (Basics), Java.

Web Development: HTML, CSS.

Tools & Platforms: Visual Studio Code, Android Studio

Extracurricular & Leadership

- **Class Representative:** Acted as liaison between students ensuring smooth communication of academic and administrative concerns and faculty and took initiative in resolving student issues.
- **ANVSA Member:** Engaged in fundraising, food drives, and social impact activities.
- **JIJNASA Tech Event Coordinator:** Oversaw planning, participation, and event execution at BRECW.

Non-Technical Skills

- Strong problem-solving ability
- Adaptability and eagerness to learn
- Leadership and communication skills
- Quality-focused mindset
